

SEMINARIO DE IMÁGENES Y VISIÓN
INSTITUTO DE OPTICA (CSIC)

Current research on myopia

Frank Schaeffel, PhD

Section of Neurobiology of the eye, University of Tuebingen

Chick and wild type mouse as animal models for myopia

ABSTRACT

The seminar will describe different attempts to learn about the potential mechanisms for myopia development (environmental, inheritance). Experiments on animal models for myopia, as well as evidence in human eyes will be presented. The effects of pharmacological agents as well as near work on controlling axial elongation will be discussed.

Note: A light lunch will be served.

Viernes, 25 noviembre 2005

13:30 horas
