Members in the news

Jay Neitz, PhD and Susana Marcos, PhD

Neitz and Marcos were named [Fellows of the Optical Society of America](#).

Jay Neitz, Medical College of Wisconsin: For advancing our understanding of the genetic and biological basis of human color vision.

Susana Marcos, Consejo Superior de Investigaciones Cientificas, Spain: For contributions to visual optics, in particular in the areas of photoreceptor optics and ocular aberrations, with advancements in basic knowledge of the optical properties of the eye and relevant ophthalmic applications.

Abbot Clark, PhD

Clark, former vice president of discovery research and head of glaucoma research at Alcon Laboratories Inc., has left retirement to become director of the North Texas Eye Research Institute.

John Werner, PhD

Werner (University of California-Davis) and researchers at three other universities will share a \$5 million NEI grant to continue developing technology for three-dimensional imaging of eye cells in a project that has been described as the "Hubble telescope" of the eye..

Elke Luetjen-Drecoll, MD

Luetjen-Drecoll of the University of Erlangen Nurnberg is the new vice president of the German Academies of Sciences.
